scoped_read.sh — Companion Guide

Revision: 1 **Last modified:** 2026-07-17T00:00:00Z

Overview

§11.4.141 M4 implementation. Prevents full-file loading when a targeted read suffices.

Functions

Function	Purpose	Example
`sr_grep_then_read`	Grep pattern → read matching lines with context	`sr_grep_then_read "func" "main.go" 5`
`sr_section_read`	Read section by heading match	`sr_section_read "## Usage" "README.md"`
`sr_cached_result`	Cache command results (5min TTL)	`sr_cached_result "key" "command"`
`sr_clear_cache`	Clear the cache	`sr_clear_cache`

Usage

```
source constitution/scripts/token_efficiency/scoped_read.sh

# Read 5 lines of context around "func main" in main.go
sr_grep_then_read "func main" "main.go" 5

# Read the "## Usage" section from README.md
sr_section_read "## Usage" "README.md"

# Cache a command result
sr_cached_result "git_status" "git status --short"
```
