token_efficiency_lib.sh — Companion Guide

Revision: 1 **Last modified:** 2026-07-17T00:00:00Z

Overview

§11.4.141 M5+M6 implementation. Provides terse status, batch reads, and cached grep for token-efficient operations.

Functions

Function	Purpose	Example
`te_status_line`	Terse one-line status	`te_status_line "Build started"`
`te_batch_read`	Read multiple files, return summary	`te_batch_read file1.md file2.md`
`te_cached_grep`	Grep with result caching	`te_cached_grep "pattern" "file.sh"`
`te_clear_cache`	Clear the cache	`te_clear_cache`

Usage

```
source constitution/scripts/token_efficiency/token_efficiency_lib.sh

# Terse status
te_status_line "Processing item ATM-751"

# Batch read multiple files
te_batch_read docs/Issues.md docs/Fixed.md

# Cached grep (result cached for 5 minutes)
te_cached_grep "§11.4" CLAUDE.md
```
