as_good_single_component (golden-good, AS-)

Changes ONLY `src/alpha.sh`. `gate_alpha`'s sole observed input is that path, so it MUST be selected; the other 4 gates' observed inputs are all untouched, so they MUST each appear in `skipped` with `reason_code=NO_OBSERVED_INPUT_CHANGED` (AS-011) -- an exact, re-checkable skip reason, not a bare "skipped".
