T render_keys fixture — changed-source toy document

Revision: 1 **Last modified:** 2026-09-29T00:00:00Z

This is a small, real toy Markdown document used ONLY as test-fixture data for T062's RED test (`test_render_keys_red.sh` , scenario `rk_changed_all_four`). This file's content is real content, byte-for-byte edited between two baseline renders (v1 → v2) so the test can prove a genuine content change causes the CURRENT exporter (`scripts/testing/sync_all_markdown_exports.sh`) to regenerate all three sibling formats (.html/.pdf/.docx), alongside this file itself as the source of truth — the §11.4.65 "four formats" (.md + .html + .pdf + .docx).

Marker: RK-CHANGED-V1
